

KV Pharmaceutical Company, Inc.

From:	Associate Director, Clinical Operations, KV Pharmaceutical Company
-------	--

To Whom It May Concern,

This is my personal recommendation in support of Global Clinical Trials. In my seven years of employment at KV Pharmaceutical Company in St. Louis, Missouri, I have had the opportunity to work directly with GCT on three FDA registration studies. In addition, KV Pharmaceutical is currently working with GCT on two additional FDA registration studies. GCT has consistently performed at a high level, supporting both NDA and ANDA programs for KV.

In my view, a strong indication of quality performance is directly related to repeat business, KV Pharmaceutical has the option of working with many different CRO vendors, yet we chose to work with GCT over other vendors in many instances. The rationale for choosing GCT over other vendors is simple. GCT has demonstrated strong leadership, the ability to meet and exceed key project deliverables, flexibility and professionalism. FDA and KV Quality Assurance have independently conducted audits of GCT offices and investigative sites in St. Petersburg, Russia. The results of both audits were extremely positive I have personally visited GCT offices in Princeton, NJ as well as the St. Petersburg, Russia office and have met most of the GCT staff. The quality of GCT people and their ability to deliver on project commitments is a major reason why KV continues to consider GCT for business opportunities. I give GCT my highest personal recommendation as a CRO provider.

Please note that this is a personal recommendation, not necessarily reflective of KV Pharmaceutical Company or its shareholders. I would be happy to answer any questions you may have regarding my experience in working directly with GCT.

Sincerely,

Associate Director, Clinical Operations
KV Pharmaceutical Company
