

Marinus Pharmaceuticals, LLC

From:	Chief Executive Officer
Date:	31 Oct 2016

Marinus engaged the GCT team to conduct our Phase 3 Focal Onset Seizure trial in Russia and Bulgaria. From the very beginning of the project GCT conducted themselves at all levels in a very professional and effective manner. Plans were detailed, accurate and cost effective. Execution of the study including a significant project scope change by Marinus was conducted on time, on budget with high quality.

From top management to the day-to-day project team communications between the two companies were efficient and effective. Marinus would engage GCT on any future work in Russia and Eastern Europe.
