

## **Santen Oy**

Dear all,

I'm happy to inform you that yesterday the database was finally closed, subject classification was completed and in the evening the treatment code was opened. Therefore, the analysis of the results can now start.

For this I'd like to thank all of you for your contribution to our study - it has been a great pleasure working together with you!

You can also start to prepare the close out activities and I will send you a separate e-mail regarding this.

Kind regards
