

## Medisorb, JSC

From:	CEO JSC Medisorb
Date:	18 October 2018

JSC "Medisorb" thanks Global Clinical Trials, LLC for organizing the clinical trial in Russian Federation for investigating the properties of the medical product *Sevoflurane* MC, inhalation liquid for medical use for the purpose of determining therapeutical equivalence of the generic product *Sevoflurane* MC compared to the original product *Sevorane* when these products are used to induce general inhalation anesthesia on patients while performing an abdominal surgical operation.

CRO Global Clinical Trials has successfully provided the services related to selection, management and monitoring of the research sites, preparation and submission of the regulatory documents to the Local Ethic Committee, contracting and further managing the subcontractors, and general project management.

The high standards of quality were demonstrated and assured during the audits performed by JSC "Medisorb". As a result of the clinical trial, conducted by Global Clinical Trials, JSC "Medisorb" has successfully registered the product for medical use by on the territory of the Russian Federation.

We are happy to recommend Global Clinical Trials, LLC as a bona fide Contract Research Organization, and we look forward to the further successful development of our partnership.

CEO,

Medisorb JSC
